Members' Area of CSCA website

Login details sent to CSCA members in Summer 2025. All documents including the **CSCA Standard specification for maintenance water quality monitoring in closed circuit water distribution systems**. CSCA Members gain exclusive access to technical documents, containing valuable information and guidance on closed systems, including:

- Closed Circuit Guidance and Standards
- Pre-Commission Cleaning
- Closed Circuit Inhibitors
- Microbiology and Closed-Circuit Systems
- Biocide Selection
- Formulating Closed Circuit Systems
- Clarification of status BG29, BG50 and BS8552
- Sludge Formation in New Systems
- Advantages and Disadvantages of 6 Port Valves
- Analysis Samples in Transit to Labs

BSRIA is developing a comprehensive guide on non-chemically dosed water treatment for closed heating and cooling systems. This forthcoming guide will provide essential guidance for designers, contractors, facilities managers and water treatment specialists looking to implement an alternative approach. The guide is currently in development, with publication targeted for early 2026. For more information about this project, please contact publications@bsria.co.uk.

CSCA Audits for Service Provider Members

We are delighted to inform everybody that CSCA online audits will begin at the end of 2025. CSCA members registered for Maintenance Water Treatment and Pre Commission & Remedial Cleaning will be audited by **Jill Cooper**. The audit form is in the members' area alongside the Service Delivery Standards and other information. **Details about your upcoming audit will be emailed to you.**

CSCA are exhibiting!
